The first time I ran a command in the terminal of my most preferred Linux Distribution CentOS 7, I intuitively knew that Linux would become a huge part of my formative years. Linux has provided me with an engaging and challenging platform that has allowed me to continuously learn and improve my skills. What started with a simple *echo "Hello World!"* statement has become a fully-fledged passion that only gets more exciting as time goes by.

EXPERIENCE

LINUX LOGBOOK PORTFOLIO
A portfolio showcasing my Linux skills using Slackware 13.37 VMware Virtual Machine. I am proficient at using the Oracle VM VirtualBox and the Ubuntu and CentOS Linux distributions. Tasks were completed on the following topics:
1. Basic Linux Commands   2. Systems Access and File System   3. Shell Scripting   3. Daemons and Processes 5. Email under Linux   6. Apache HTTP Server and PHP 8. Network Traffic Analysis
